Oral and Maxillofacial Surgery: Current Clinical Practice and Future Trends

Message from the Guest Editor

With the rapid development of medical equipment, surgical techniques and biological materials, the field of oral and maxillofacial surgery has changed dramatically in recent decades. Digital surgery, including virtual surgery, has improved accuracy and safety in diagnosis and treatment and personalized craniomaxillofacial reconstructive surgery. Minimally invasive surgery, such as endoscopic surgery, has proved more advantageous than conventional open surgery methods in maximizing preservation of natural anatomy and minimizing postoperative complications. Functional surgery has minimized damage to maxillofacial vital tissues and organs, especially for patients with tumors. Advances in biological materials, stem cell and tissue engineering and regenerative medicine have improved therapeutic outcomes and promoted wound healing. Sustained development of evidence-based medicine has allowed surgeons to make good decisions and modify traditional surgical procedures. This Special Issue, entitled “Oral and Maxillofacial Surgery: Current Clinical Practice and Future Trends”, aims to explore future trends in oral and maxillofacial surgery.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andr s

Internal Medicine Department, University Hospital Strasbourg, 67081
Strasbourg, France

Prof. Dr. Kent Doi

Department of Emergency and Critical Care Medicine, The University of
Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1
(General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
