Special Issue

New Insights in Retina Diseases

Message from the Guest Editors

The Special Issue aims to disseminate innovative research that addresses key gaps in our understanding. These include the role of inflammation, oxidative stress, neurodegeneration, and genetic predisposition in the onset and progression of major retinal disorders such as age-related macular degeneration, diabetic retinopathy. inherited retinal dystrophies, retinal vasculopathies, and vitreoretinal disorders. We particularly seek studies that highlight novel diagnostic approaches, with a focus on advanced imaging technologies that provide a noninvasive, high-resolution evaluation of retinal microarchitecture and vascular networks. Additional areas of interest include artificial intelligence applications, biomarker discovery, and innovative therapeutic strategies, including gene therapy, cellbased interventions, and neuroprotective approaches. By integrating evidence from both basic science and clinical practice, this Special Issue seeks to foster interdisciplinary collaboration and promote the translation of scientific progress into improved patient care.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine*'s (*JCM*) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andrès

Internal Medicine Department, University Hospital Strasbourg, 67000 Strasbourg, France

Prof. Dr. Kent Doi

Department of Acute Care Medicine, University of Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
