# Obstructive Sleep Apnea (OSA) –New Pathways for Targeted Therapy

### Message from the Guest Editor

Obstructive sleep apnea syndrome (OSAS) is a chronic and prevalent disorder characterized by repetitive episodes of apneas and hypopneas during sleep. OSAS has been associated with increased morbidity and mortality and has emerged as an important potential etiologic factor of several cardiometabolic diseases, including hypertension, atrial fibrillation, stroke, insulin resistance (IR), and diabetes mellitus. Most of the treatment options for OSAS, including continuous positive airway pressure (CPAP), mandibular advancement devices, UA surgery, and hypoglossal nerve stimulation, are focused on improving the impaired UA anatomy. The 'gold standard' of OSAS treatment remains CPAP; however, it has a rather low compliance rate. There also remain gaps in our scientific and clinical knowledge of different pathways for targeted therapy for OSAS. There is a need to identify key clinical phenotypes of OSAS in order to employ a more targeted treatment approach and also to identify predictive factors in order to facilitate personalized treatment of this disease.

## About the Journal

### Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

### Editors-in-Chief

Prof. Dr. Emmanuel Andrès

Internal Medicine Department, University Hospital Strasbourg, 67081  
Strasbourg, France

Prof. Dr. Kent Doi

Department of Emergency and Critical Care Medicine, The University of  
Tokyo, Tokyo, Japan

---

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.5 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the second half of 2025).
