Optical Coherence Tomography in Clinic Diagnosis, Therapy and Surgery

Message from the Guest Editor

Optical Coherence Tomography (OCT) and OCT Angiography (OCT-A) have acquired a key role not only in understanding better the pathogenesis of several ocular conditions, but also as a helpful tool in the diagnosis, follow-up, and monitoring the response to medical or surgical treatments. The present Special Issue aims to enlighten on the broad range of research and clinical applications that these technologies (OCT and OCT-A) can be applied to, according to the most updated developments in the field of ophthalmology. Submissions are welcome primarily for original research articles showing innovative findings with the potential of enhancing the clinical capability of diagnosing and monitoring different ophthalmic conditions and treatments. Secondly, we will consider high-interest review articles and case series of exceptional merit.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andr  s

Internal Medicine Department, University Hospital Strasbourg, 67000
Strasbourg, France

Prof. Dr. Kent Doi
