

## Special Issue

# Occupational Diseases: From Cure to Prevention

### Message from the Guest Editors

An occupational disease (OD) is any health condition due primarily to exposure to risk factors arising from work activity. In principle, ODs can be prevented by means of control measures at worksites. Data on occupational diseases are essential for employers, social security institutions, occupational safety and health professionals and other stakeholders in relation to the prevention and control of work-related diseases. In this issue, OD are broadly defined as diseases with a specific clinical diagnosis associated with work-related factors.

For clinicians, knowledge of etiology and prevention of ODs is important for optimizing their care for patients. The diagnoses of occupational diseases is complex due to its multifactorial origin and dependent on work-related, personal (age, sex, genetic) and environmental factors. Work-related risk factors can worsen the prognosis and can hamper return to work. Therefore, clinicians should actively ask for these risk factors within their patient populations.

The present Special Issue aims to increase insight in occurrence, risk factors and preventive actions across different types of occupational diseases.

## About the Journal

### Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1  
(General Medicine)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
