

## Special Issue

# Oncogenic Human Papillomaviruses

### Message from the Guest Editors

We welcome the submission of research and review articles on the molecular mechanisms contributing to HPV-induced carcinogenesis to bring together expert opinion and new advances from across the field in a Special Issue. We welcome proposals covering any relevant clinical or translational topics, including epidemiology, immune responses, viral oncogenes in cell transformation, virus and host mutational profiles, methylation, miRNA expression profiles, and new therapies including vaccines against HPVs that are related to tumor pathologies of different anatomic localization (i.e., anogenital, oropharyngeal, cutaneous, conjunctival, and other localizations).
