

## Special Issue

# Oral Health and Dental Care in Older Adults

### Message from the Guest Editors

As people age, they often develop general health problems that can determine their oral health and complicate dental management. The most prevalent oral diseases, such as dental caries, periodontal disease and tooth loss, are common in the elderly. A clear association has also been demonstrated between oral and systemic diseases, and findings in this field continue to generate new evidence on a constant basis.

This Special Issue will present original articles, narrative and systematic reviews and meta-analyses on odontology in older adults, covering topics including:

- Geriatric dentistry education and sensitization for providing oral health care for older adult patients.
- Prevention of the most prevalent oral diseases (caries and periodontal disease) in older adult patients and application of new materials and technology for their treatment.
- The relationship between oral health and the most prevalent systemic diseases in advanced age (dementia, Alzheimer's disease, diabetes and cardiovascular diseases).
- Oral health care for dependent or institutionalized older adults.
- Oral health care for frail older adults and end-of-life care.

### Guest Editors

Dr. Márcio Diniz-Freitas

Special Care Dentistry Unit, School of Medicine and Dentistry and Medical-Surgical Dentistry Research Group (OMEQUI), Health Research Institute of Santiago de Compostela (IDIS), University of Santiago de Compostela (USC), 15782 Santiago de Compostela, Spain

Dr. Pilar Gándara-Vila

Oral Medicine, Oral Surgery and Implantology Unit (MedOralRes), School of Medicine and Dentistry and ORALRES Group, Health Research Institute of Santiago de Compostela (FIDIS), University of Santiago de Compostela (USC), 15782 Santiago de Compostela, Spain

### Deadline for manuscript submissions

## About the Journal

### Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1  
(General Medicine)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
