

Special Issue

Orthodontics: Current Clinical Status and Future Challenges

Message from the Guest Editors

Orthodontics has developed rapidly over the last 20 years. The turning point is the rise of digital orthodontics and the increasing interest of the public in the new possibilities, which influenced the demand for orthodontic treatment as well. Besides this, interdisciplinary orthodontics became an expanding field, and it extended the boundaries within which orthodontics had taken place in the past. This also benefits immensely the treatment of patients with orofacial clefts and craniofacial anomalies. This special issue focuses on the current status and future challenges in orthodontics, and more in particular orthodontic diagnostics, treatment planning, and treatment outcome. On behalf of the Journal of Clinical Medicine, you are cordially invited to contribute an article to the Special Issue “Orthodontics: Current Clinical Status and Future Challenges.” Research articles, systematic and comprehensive reviews, and short communications are welcome to submit. Case reports and short/mini reviews will not be considered.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!
