

## Special Issue

# Clinical Management of Osteoporotic Fractures

### Message from the Guest Editors

Osteoporotic fractures cause deterioration in patients' quality of life and activities of daily living and have recently been reported to increase the risk of death.

However, there are still various unresolved problems in the prevention, diagnosis, conservative treatment, and surgical treatment of osteoporotic fractures; for example, the usefulness of braces has not been established for fresh osteoporotic vertebral fractures, and the appropriate duration of bracing remains unclear. Osteoporotic fractures can lead to serious social problems and huge economic losses if not properly managed. Therefore, it is very important to gain detailed knowledge about the prevention, diagnosis, and treatment of osteoporotic fractures.

This Special Issue, "Clinical Management of Osteoporotic Fractures", aims to provide an updated overview of the prevention, diagnosis, and treatment of osteoporotic fractures. This Special Issue covers not only vertebral fractures but also fractures of the extremities. We invite researchers to submit original research and review articles on the management of osteoporotic fractures.

## About the Journal

### Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.5 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the second half of 2025).
