

## Special Issue

# Objective Methods of Assessing Fluid Status to Optimize Volume Management in Kidney Disease and Hypertension

### Message from the Guest Editors

This Special Issue will explore the methods of assessing fluid status to optimize volume management in kidney diseases and hypertension. Assessing the ideal volume status is an ongoing challenge in kidney disease patients, including recipients of kidney replacement therapies. For this Special Issue, we are also seeking papers that examine the impact of emerging and newly discovered pharmacological agents on the assessment of volume status. We are particularly interested in the correlation and relative value of these technologies in various settings; new results obtained using existing technologies; and possible incremental values of each technology. The emergence of artificial intelligence and machine learning offers yet another tool with which to assess the values of current or novel technologies. Objective methods of volume assessment will have educational value in fine-tuning clinical skills of early learners and providing new ways to validate our patients' voices and concerns.

### Guest Editors

Dr. Mihály Tapolyai

1. Department of Internal Medicine, Division of Dialysis, Szent Margit Hospital, Budapest 1032, Hungary
2. Department of Medicine (Nephrology Section), Ralph H. Johnson VA Medical Center, Charleston, SC 29401, USA

Prof. Dr. Tibor Fülöp

1. Nephrology, Department of Medicine, Medical University of South Carolina, Charleston, SC 29425, USA
2. Medical Services, Ralph H. Johnson VA Medical Center, Charleston, SC 29401, USA

### Deadline for manuscript submissions

closed (15 March 2024)

## About the Journal

### Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's (JCM)* staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.5 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the second half of 2025).
