

## Special Issue

# Clinical Advances in Skin Cancer: A Closer Look at Non-Melanoma Types

### Message from the Guest Editor

Non-melanoma skin cancers (NMSCs) are by far the most common malignancies worldwide. They include keratinocyte skin cancer, such as basal cell carcinoma and squamous cell carcinoma. Basal cell carcinoma comprises approximately 80% of NMSCs and most of the remainder are cutaneous squamous cell carcinomas. The incidence of NMSC has progressively increased in recent decades, so that one in every three cancers diagnosed each year is a type of skin cancer, according to the World Health Organization (WHO). The predominant risk factor for NMSC is exposure to solar UV radiation. Skin type also plays a role, with a higher incidence of NMSC among faired-skinned individuals. Moreover, immunocompromise can increase the risk. If detected early, the prognosis is often excellent. Nevertheless, more than 5000 people worldwide die of advanced NMSC every month. For this Special Issue on *JCM* focused on skin cancers, we welcome original research and review articles that provide an overview of the most recent advances and future challenges for the diagnosis and treatment of NMSCs. Research areas may include the following tumors: actinic keratosis, basal cell carcinoma, and squamous cell carcinoma.

## About the Journal

### Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPLus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.5 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the second half of 2025).
