

## Special Issue

# Targeted Treatment in Head-Neck Cancer

### Message from the Guest Editors

This Special Issue to explore the advancements and challenges in personalized and precision medicine approaches for the management of head and neck cancer. This Special Issue invites original research articles that delve into various aspects of targeted treatment for head-neck cancer. We encourage submissions focusing on novel targeted therapies, immunotherapy and other precision medicine approaches that address the unique characteristics of head and neck tumors. We seek comprehensive research articles, clinical studies, experimental investigations and translational studies that shed light on the latest developments in targeted treatment within the field of head-neck cancer. However, please note that this Special Issue will not consider mini-reviews or case reports. We look forward to receiving your submissions and contributing to the collective understanding of targeted treatment potential in improving outcomes for patients with head and neck cancer.

## About the Journal

### Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!
