Breast Reconstruction: The Current Environment and Future Directions

Message from the Guest Editor

The field of breast reconstruction is constantly evolving, aiming to enhance patient experience and achieve optimal results. In today's healthcare landscape, informed patients are seeking the best clinical outcomes, leading to a growing demand for breast reconstruction procedures. Regulatory scrutiny of implantable devices used in these procedures places a significant responsibility on plastic surgeons to gather and assess data rigorously, ensuring high-quality care and continued access to advanced resources. Plastic surgeons are dedicated to improving patient access to breast reconstruction by streamlining processes, managing costs efficiently and prioritizing patient satisfaction. This issue focuses on the changing landscape of plastic and reconstructive surgery.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andr  s

Internal Medicine Department, University Hospital Strasbourg, 67000
Strasbourg, France

Prof. Dr. Kent Doi
