Special Issue

Modern Approaches to the Management of Orthopedic Injuries

Message from the Guest Editor

This Special Issue focuses on the updated management of orthopedic injuries. These injuries represent a significant portion of trauma cases, often resulting from high-impact incidents such as road accidents. The prevalence of these injuries highlights the need for effective evacuation, stabilization, and treatment strategies aimed at rehabilitation. Recent literature indicates that these strategies can save lives and preserve limbs. This Special Issue aims to compile and present international findings on modern practices in managing traumatic orthopedic injuries to enhance patient outcomes across various settings.
