

Special Issue

Modern Approaches to the Management of Orthopedic Injuries

Message from the Guest Editor

This Special Issue focuses on the updated management of orthopedic injuries. These injuries represent a significant portion of trauma cases, often resulting from high-impact incidents such as road accidents. The prevalence of these injuries highlights the need for effective evacuation, stabilization, and treatment strategies aimed at rehabilitation. Recent literature indicates that these strategies can save lives and preserve limbs. This Special Issue aims to compile and present international findings on modern practices in managing traumatic orthopedic injuries to enhance patient outcomes across various settings.

About the Journal

Message from the Editor-in-Chief

Journal of Clinical Medicine (ISSN 2077-0383) is an international, peer-reviewed, open access journal dedicated to advancing clinical and preclinical research. Our Editorial Board and staff are committed to delivering cutting-edge, timely, peer-reviewed articles spanning the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and impactful research articles, as well as reviews that are clinically significant and relevant to the full spectrum of medical disciplines. All full texts are archived in PubMed Central and indexed in SCIE (Web of Science), Scopus, PubMed, and other major databases. We invite you to submit your manuscript for publication, as well as join our community as a reviewer or reader online.

Editors-in-Chief
