Special Issue

Recent Management and Future Perspectives on Knee Arthroplasty

Message from the Guest Editor

Total knee arthroplasty (TKA) is a widely performed procedure aimed at alleviating pain and improving function in patients with end-stage arthritis. Despite its success, a subset of patients report dissatisfaction, often due to postoperative pain, stiffness, or knee laxity. Recent research has focused on evaluating various parameters to optimize outcomes, including alignment, implant design, and surgical techniques. This special issue reviews current evidence regarding advancements in TKA, such as the use of roboticassisted surgery and personalized implants, with an emphasis on evidence-based approaches. It discusses the importance of individualized treatment strategies tailored to each patient's anatomy and biomechanics, supported by recent clinical studies. The goal of this Special Issue is to present a balanced, evidence-driven overview of the current state of TKA and identify avenues for future research based on robust scientific data.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine*'s (*JCM*) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andrès

Internal Medicine Department, University Hospital Strasbourg, 67000 Strasbourg, France

Prof. Dr. Kent Doi

Department of Emergency and Critical Care Medicine, University of Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
