

Special Issue

Personalized Medicine and Treatment of Acute Coronary Syndrome

Message from the Guest Editor

This Special Issue delves into the realm of personalized medicine and its application in the treatment of acute coronary syndrome (ACS). ACS encompasses a spectrum of cardiovascular conditions, including unstable angina and myocardial infarction, which require prompt and tailored medical interventions. The aim of this Special Issue is to explore the latest advancements in personalized medicine for ACS, with a specific focus on clinical aspects. It covers topics such as risk stratification tools, diagnostic modalities, individualized treatment approaches and long-term management strategies. By highlighting the role of personalized medicine in ACS, this Special Issue aims to enhance clinical decision-making, optimize patient outcomes and improve overall care in the field of cardiology.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andrès

Internal Medicine Department, University Hospital Strasbourg, 67081
Strasbourg, France
