Advances in the Diagnosis and Treatment of Brain Damage

Message from the Guest Editor

There are multiple pathophysiological conditions, including neurovascular diseases, neuro-trauma, infectious diseases, neurodegenerative diseases, tumors, and neuroinflammation, which lead to brain damage and are associated with various clinical symptoms. Although huge advances with regards to molecular diagnostics and MRI have been made during clinical work-up, differential diagnoses might still be challenging, it is often difficult to predict future disease courses, and the clinical presentation is not always reflected by corresponding brain lesions on MRI. Despite growing treatment options that address direct pathophysiological mechanisms, the brain is a highly complex organ that is still challenging to treat and multiple diseases can only be treated symptomatically. With this Special Issue, we hope to encourage submissions that discuss the current state-of-the-art of both clinical and radiological features of brain damage, molecular aspects (such as serum or CSF markers in different diseases), newly evolving diagnostic tools, and therapies (such as neuro-regenerative treatments), as well as address challenges and ongoing controversies.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andrès

Internal Medicine Department, University Hospital Strasbourg, 67000
Strasbourg, France

Prof. Dr. Kent Doi

Department of Acute Care Medicine, University of Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1
(General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
