Skin Cancers: Update on Clinical Treatment and Management

Message from the Guest Editor

Skin cancers, including basal cell carcinoma, squamous cell carcinoma, and melanoma, have continued to rise globally over the past few decades, and statistics have shown that skin cancer is one of the three most common forms of cancer. Fortunately, novel, more effective treatments for various types of skin cancer are in development, and early diagnosis and the exploration of innovative treatments are particularly important. This Special Issue will focus on recent advances in skin cancer prevention, diagnosis, and treatment and the latest insights gained by clinical researchers, with a focus on how to personalize these new advances in clinical practice.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andrès

Internal Medicine Department, University Hospital Strasbourg, 67081
Strasbourg, France

Prof. Dr. Kent Doi
