

## Special Issue

# Pragmatism and Digitization in Cardiovascular Research

### Message from the Guest Editor

The majority of cardiovascular RCTs test interventions in selected populations under explicitly protocol-defined settings, limiting the generalizability of findings.

Therefore, the emphasis on the need for increased pragmatism and decentralization of clinical trials has increased recently. In this context, the concept of 'pragmatism' addresses concerns regarding the limited generalizability of findings in cardiovascular diseases, and optimizes effectiveness over efficacy evaluation.

Potential topics include, but are not limited to:

- 1) Original studies using digital technologies and pragmatic approaches for evidence generation;
- 2) Current challenges and potential solutions to the implementation of pragmatism into clinical trials;
- 3) Current challenges and potential solutions to the use of digital health technologies in evidence generation;
- 4) Leveraging electronic health records or administrative databases for evidence generation;
- 5) Outcomes adjudication in clinical trials;
- 6) Current landscape of registry-based trials.

We welcome papers that address this broad topic to update its research progress.

## About the Journal

### Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's (JCM)* staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

### Editors-in-Chief

Prof. Dr. Emmanuel Andrès

Internal Medicine Department, University Hospital Strasbourg, 67081  
Strasbourg, France

Prof. Dr. Kent Doi

Department of Emergency and Critical Care Medicine, The University of  
Tokyo, Tokyo, Japan

---

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.5 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the second half of 2025).
