Gastrointestinal Endoscopy: Clinical Advances in Diagnosis and Treatment, 2nd Edition

Message from the Guest Editors

Endoscopy is of the utmost importance in the diagnosis and treatment of gastrointestinal lesions. In fact, endoscopic resection is the mainstay treatment for premalignant and early malignant lesions of the gastrointestinal tract. There is now solid evidence about the efficacy and safety of techniques, such as endoscopic mucosal resection (EMR) or endoscopic submucosal dissection (ESD), for the treatment of epithelial neoplasia along the gastrointestinal tract, as well as other techniques, such as full-thickness resection (EFTR), endoscopic intermuscular, or subserosal dissection (EID/ ESSD), which expand our endoscopic toolkit for the management of these lesions. In addition, the use of endoscopy in the treatment of subepithelial lesions is already established. Besides its use in the digestive tract, endoscopy is extremely important for the diagnosis and treatment of hepatobiliopancreatic conditions. In this Special Issue, we welcome any original research, technical notes, or review articles in the field of diagnostic or therapeutic gastrointestinal endoscopy.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andrès

Internal Medicine Department, University Hospital Strasbourg, 67081
Strasbourg, France

Prof. Dr. Kent Doi

Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.5 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the second half of 2025).
