Advances in Surgical Management of Urinary Stones

Message from the Guest Editor

The progress of endourology has been remarkable, with emerging technology for the treatment of urolithiasis increasing exponentially year after year. From scopes to lasers to disposable devices, urologists need to keep up with the new technology to ensure the most accurate assessment and the most objective considerations and provide the best care to patients. In this Special Issue, we invite authors to submit papers on the most recent advances in surgical management of urinary stones to provide some insight to our colleagues in these new technologies.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief
