# Atrial Fibrillation: Catheter Ablation Techniques and Management Strategies

### Message from the Guest Editor

Cardiac electrophysiology is one of the most rapidly developing fields of cardiology. We are witnessing the advent of new energy modalities for ablation, novel physiologic options for pacing, and the opportunity to develop completely X-ray-free EP labs. Some older ablation concepts are being revisited, like high-power short-duration radiofrequency ablation, novel resizable cryoballoon devices, and hybrid, epicardial AF ablation. However, the hottest topic is electroporation, which is gradually becoming the dominant energy source for pulmonary vein isolation and wider ablation in the atria. Currently, there are a variety of PFE catheters available on the market, such as Varipulse, Farawawe, PulseSelect, Affera, etc. We know that not all PFE systems are created equally; so far, little data exist comparing these new ablation systems. Secondly, left appendage occluders are now widely used, and new studies have a potential to further expand LAAOcc usage, potentially as a second step in AF ablation.

## About the Journal

### Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

### Editors-in-Chief

Prof. Dr. Emmanuel Andrès

Internal Medicine Department, University Hospital Strasbourg, 67081  
Strasbourg, France

Prof. Dr. Kent Doi

Department of Emergency and Critical Care Medicine, The University of  
Tokyo, Tokyo, Japan

---

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.5 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the second half of 2025).
