

Special Issue

Pain, Psychiatry and Addiction

Message from the Guest Editors

Painful somatic symptoms are common in psychiatric patients, especially among depressed patients, it is concerning when PSS are expressed in bipolar or in (sub)-threshold bipolar patients.

The broad availability of prescription pain medications (PPMs) and prescription substitution medications (PSMs), coupled with public misconceptions about their safety and addictive potential, have contributed to the recent surge in the nonmedical use of prescription opioids (POs) and corresponding increases in treatment admissions for problems related to opioid misuse.

Prescription opioid use disorder (POUD) is an established public health crisis in many countries. Many specialists play a role in these different kinds of painful manifestations, including pain, psychiatry, and addiction medicine specialists, especially in the diagnosis and management of POUD. Still, neither group can adequately address these patients' needs alone. The purpose of this Special Issue was to bring together experts from pain, psychiatry, and addiction medicine to examine the positions of all three specialities in assessing and treating PSSs in psychiatric and/or in POUD patients with and without a dual disorder.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andrès

Internal Medicine Department, University Hospital Strasbourg, 67081
Strasbourg, France
