Recent Advances in Pancreatic Neoplasms

Message from the Guest Editor

Pancreatic cancer is the fourth leading of cancer death in Western countries. Surgery and adjuvant therapy remains the standard treatment, but the recurrence rate is still high. Multimodality treatment appears essential in order to obtain better results, but definitive conclusions are lacking. There is a need for a better understanding of genetic alterations, clarifying the role of new biomarkers for precursor and invasive tumors, the identification of prognostic factors, and the management of recurrent cancer for patient's tailored therapy. Furthermore, neuroendocrine tumors are increasingly recognized in clinical practice, and they include a variety of neoplasms with a different biological behaviour and treatment. In particular, the management of small non-functioning tumors is still controversial, while the treatment of advanced disease requires novel research strategies. The aim of this Special Issue is to focus on the results and problems of multimodality therapy for resectable and locally advanced pancreatic tumors, the search of prognostic factors for early and late outcomes after therapy, and the evaluation of novel strategies for individualized treatment.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andr  s

Internal Medicine Department, University Hospital Strasbourg, 67000
Strasbourg, France

Prof. Dr. Kent Doi

Department of Acute Care Medicine, University of Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
