Pediatric Neurology—Current Challenges and Future Perspectives

Message from the Guest Editor

Pediatric neurology is a relatively new branch of medicine and neurosciences. The growing advances in neuroscience, including brain developmental neurobiology, along with the advances in diagnostic testing, such as neuroimaging and molecular biology, have given a new impetus to the field of child neurology. Child's brain, from the first weeks of the intrauterine life to adolescence, is a complex developing machinery, and all pathological conditions can be interpreted in the light of perturbation of this highly sophisticated process, leading to an abnormal development. Timing of the disruption of the neural maturation is a diagnostic and prognostic clue. The interplay between genetic and environmental factors is challenging current concepts on pathophysiology of both genetic and acquired diseases and provides a novel framework for interpreting emerging phenotypes. As a result, the overcoming of old interpretative models of disease becomes an urgent need. On the other hand, the progress in diagnostic possibilities and the emerging innovative therapeutic options raise new ethical issues to be addressed.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andr s

Internal Medicine Department, University Hospital Strasbourg, 67000
Strasbourg, France

Prof. Dr. Kent Doi

Department of Acute Care Medicine, University of Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
