

Special Issue

Improving Perinatal Outcomes in Twin and Multiple Pregnancy

Message from the Guest Editors

Multiple pregnancies are a major public health concern due to the significantly higher health risks for both mothers and newborns, as well as the impact on healthcare costs. Despite advances in antenatal care and prenatal diagnosis, twins and multiples remain high-risk pregnancies with excess perinatal mortality and morbidity. Over the past few years, a number of studies on the topic have been published, helping to provide a better understanding of the natural history and perinatal outcomes. However, it is also clear that much remains to be learned. The Global Twins and Multiples Priority Setting Partnership have identified the 10 most important research questions related to the future health of multiples and their families in 2019. These included assessment of growth patterns, short- and long-term outcomes, antenatal risk factors, medical interventions to reduce complications, and measures to reduce admission to the neonatal unit. With this Special Issue, we hope to encourage submissions that discuss the current state-of-the-art, address ongoing knowledge gaps, and focus on ongoing controversies related to twin and multiple pregnancies.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andr  s

Internal Medicine Department, University Hospital Strasbourg, 67000
Strasbourg, France

Prof. Dr. Kent Doi

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1
(General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
