Periodontitis: Current Status and the Future

Message from the Guest Editor

Periodontitis is a common inflammatory disease in which the composition of the oral biofilm as well as the individual immune response have significant impacts. Severe periodontitis was amongst the most prevalent condition in the world in accordance to the Global Burden of Disease Study (2016), leading to periodontitis being a public health problem. It is widely accepted that periodontitis may be a modifiable risk factor/modulator for several systemic diseases including diabetes, cardiovascular disease, adverse pregnancy outcomes, rheumatoid arthritis, chronic obstructive pulmonary disease, and chronic kidney disease. It seems to have an influence not only on the manifestation and progression but also on the prognosis of several systemic diseases. The biological plausibility linking periodontitis and various systemic diseases could, among other things, be due to bacteremia and the associated systemic inflammatory consequences. This raises the question of whether individualized periodontal therapy could possibly reduce the risk of the development of systemic diseases or positively influence their outcome.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andr  s

Internal Medicine Department, University Hospital Strasbourg, 67000
Strasbourg, France

Prof. Dr. Kent Doi

Department of Acute Care Medicine, University of Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
