Advances in Peripheral Revascularization

Message from the Guest Editor

Peripheral arterial disease (PAD) is one of the leading causes for major amputations. In particular, patients with critical limb ischemia are at increased risk for both major adverse limb events and major adverse cardiovascular events. Therefore, peripheral revascularisation is very important to improve the prognosis of PAD patients. There are two principal options: endovascular or surgical revascularisation. This issue will give an overview on the current treatment option for aorto-iliac, femoro-popliteal and below the knee revascularisation. In addition, it will summarise state of the art for post-procedure management, including medical therapy, on a combination of original research and review papers. Topics will include

- Impact of revascularisation on prognosis
- Management of chronic critical limb ischemia
- Management of acute limb ischemia
- Aorto-iliac revascularisation: endovascular and surgical
- Femoro-popliteal revascularisation: endovascular and surgical
- Below the knee revascularisation: endovascular and surgical
- Follow-up after peripheral revascularisation
- Anti-thrombotic management after peripheral revascularisation

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andr  s

Internal Medicine Department, University Hospital Strasbourg, 67000
Strasbourg, France

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1
(General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the second half of 2024).
