Pharmacoepidemiology

Message from the Guest Editor

Pharmacoepidemiology, the utilization and effects of drugs in populations, is a growing field. The introduction of several new medicines, and the increasing use of existing medicines, as well as ageing populations, have contributed to the international interest in pharmacoepidemiology. Medicines are often used for multiple indications and in individuals with multiple morbidities, leading to potential benefits but also risks or adverse effects. The safe, effective, and quality use of medicines, as well as their costs and associated health outcomes, is of relevance to a wide audience of patients, health care professionals, researchers, policy and decision makers, regulators and others. Advanced statistical and epidemiological methodologies are often applied in pharmacoepidemiological research to help reduce or eliminate bias and confounding in real world or observational data. The present Special Issue aims to examine the advances in pharmacoepidemiology and application to real world data from different settings.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andrès

Internal Medicine Department, University Hospital Strasbourg, 67081
Strasbourg, France

Prof. Dr. Kent Doi

Department of Emergency and Critical Care Medicine, The University of
Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPLus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.5 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the second half of 2025).
