Malignant Pleural Mesothelioma: Current Challenges and Future Perspectives

Message from the Guest Editors

Malignant pleural mesothelioma (MPM) is an aggressive neoplasm that develops in the mesothelial cell layer of the pleura. Exposure to asbestos is a well-known cause of MPM. The global incidence of MPM has continuously risen along with widespread industrial use of asbestos. Recent reports have demonstrated that mesothelioma patients with familial aggregation are associated with BAP1 mutation. Recent progress in basic research and clinical practice has demonstrated some crucial evidence relating to molecular pathogenesis and perspectives on potential therapeutic approaches leading to promising treatment. This issue is designed to provide a state-of-the-art overview of recent scientific research on mesothelioma, including pathogenesis, diagnosis, and management of MPM. This Issue will identify the unmet needs in the diagnosis and management of MPM based on a combination of original research and review papers. Topics will include:

- The pathogenesis of MPM;
- The challenge in the diagnosis of MPM;
- The role of surgery in the treatment of MPM;
- The paradigm shift of systemic therapy of MPM;
- Supportive care in MPM.

About the Journal

Message from the Editorial Board

Journal of Clinical Medicine (ISSN 2077-0383) is an international, peer-reviewed, open access journal dedicated to advancing clinical and preclinical research. Our Editorial Board and staff are committed to delivering cutting-edge, timely, peer-reviewed articles spanning the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and impactful research articles, as well as reviews that are clinically significant and relevant to the full spectrum of medical disciplines. All full texts are archived in PubMed Central and indexed in SCIE (Web of Science), Scopus, PubMed, and other major databases. We invite you to submit your manuscript for publication, as well as join our community as a reviewer or reader online.

Editors-in-Chief

Prof. Dr. Emmanuel Andrès

Internal Medicine Department, University Hospital Strasbourg, 67081
Strasbourg, France

Prof. Dr. Kent Doi

Department of Emergency and Critical Care Medicine, The University of
Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1
(General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.5 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the second half of 2025).
