Recent Updates in the Management of Pneumonia and COVID-19

Message from the Guest Editor

Respiratory infections are highly prevalent and represent an important cause of mortality, morbidity, and antibiotic use. The COVID-19 pandemic has changed views on respiratory infections, and the way in which evidence for optimal diagnostic and treatment strategies is collected is rapidly evolving. The optimization of the care for patients with respiratory infections is not only important for optimal health outcomes, but also in terms of cost-for-care and antimicrobial stewardship. The focus of this Special Issue is to provide up-to-date evidence to aid physicians in their care for patients with respiratory infections.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andr  s

Internal Medicine Department, University Hospital Strasbourg, 67000
Strasbourg, France

Prof. Dr. Kent Doi
