

## Special Issue

# Ossification of the Posterior Longitudinal Ligament—Clinical Management

### Message from the Guest Editors

Ossification of the posterior longitudinal ligament often leads to neurological deficits and consequently affects the quality of life and activities of daily living. Spine surgeons and neurosurgeons need to properly diagnose, interpret the pathophysiology, and formulate optimal solutions in the treatment of such patients. To date, various studies have been conducted to develop diagnostic and therapeutic approaches, but the exact causes of OPLL have yet to be elucidated. Therefore, its natural course remains unclear, and there are many difficult cases that need therapeutic intervention. In this Special Issue, we would like to invite original papers or review articles on recent basic research, natural history, surgical innovations, the development of new diagnostic methods, and long-term perspectives in the clinical treatment of OPLL. In addition, OPLL is known to be a part of the condition of ossification of the spinal ligament (e.g., ossification of the ligamentum flavum (OLF)), so submission of studies on these topics is also welcome. We hope that this Special Issue will serve as a catalyst for the enlightenment and development of OPLL disease treatment.

### Guest Editors

Dr. Kenichiro Sakai

Dr. Toshitaka Yoshii

Dr. Takeo Furuya

Dr. Masaaki Machino

### Deadline for manuscript submissions

closed (31 July 2023)

## About the Journal

### Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

### Editors-in-Chief

Prof. Dr. Emmanuel Andr  s

Internal Medicine Department, University Hospital Strasbourg, 67000  
Strasbourg, France

Prof. Dr. Kent Doi

Department of Acute Care Medicine, University of Tokyo, Tokyo, Japan

---

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
