Practice and Research in Clinical Pharmacology

Message from the Collection Editors

Clinical pharmacology is a medical discipline whose main interest is to assess the benefit–risk balance of drug therapy at both population and individual levels in order to provide the best possible therapy to patients and to the right dose. Thus, it involves on one hand the scientific evaluation of drugs during clinical development (clinical trials and drug regulation) and clinical use (drug utilization, comparative effectiveness, pharmacovigilance, pharmacoeconomics and drug policies). On the other hand, it is a medical discipline devoted to direct patient care through drug individualization (therapeutic drug monitoring, pharmacogenetics and system clinical pharmacology) and consultancy on drug-related problems (adverse drug reactions, interactions, drug toxicology, drug selection and individual benefit–risk assessment).

Journal of Clinical Medicine has given us the opportunity to show the scope of clinical pharmacology to a broad audience and the relevance of this discipline in clinical practice. Therefore, we are looking for outstanding original manuscripts

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andr s

Internal Medicine Department, University Hospital Strasbourg, 67000
Strasbourg, France

Prof. Dr. Kent Doi

Department of Acute Care Medicine, University of Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
