Clinical Diagnosis and Management of Pregnancy Complications

Message from the Guest Editor

Pregnancy is a unique period of time in women's health, ultimately ending with the delivery of a healthy baby. Normal pregnancy is characterized by robust maternal physiological changes. These changes are meant to enable, support and adapt maternal physiology to the growing and changing demands of the growing fetus. Pregnancy complications can be divided by their relation to pre-pregnancy maternal health. The first type occurs to women with any defined morbidity preconception, such as chronic hypertension and diabetes. The second type occurs to women with subclinical, yet undiagnosed, morbidity prior to pregnancy. Gestational diabetes is one example for this type of complication, as it usually represents subclinical glucose intolerance that is aggravated to a clinical range of hyperglycemia during pregnancy. The third type of complications are those occurring during pregnancy that are unrelated to pre-pregnancy maternal care. This Special Issue "Clinical Diagnosis and Management of Pregnancy Complications", aims to provide an updated overview of the diagnosis and management of common pregnancy complications and their impact on maternal, fetal, and neonatal health.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andr s

Internal Medicine Department, University Hospital Strasbourg, 67000
Strasbourg, France

Prof. Dr. Kent Doi

Department of Acute Care Medicine, University of Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
