

Special Issue

Prenatal Imaging and Diagnosis

Message from the Guest Editors

Prenatal diagnosis has developed widely in recent years, especially thanks to advances in fetal imaging and the incorporation of other techniques for fetal evaluation, such as 3D ultrasound or fetal MRI. Prenatal detection of fetal abnormalities enables prenatal multidisciplinary counselling and establishing measures for optimizing fetal surveillance and reducing associated morbidity and mortality. Today, challenges in prenatal diagnosis concern not only diagnosis but also the identification of maternal, prenatal sonographic or environmental risk factors that correlate with postnatal outcome and prognosis, to better establish treatments and medical interventions and to reduce complications and improve long-term outcome. This Special Issue aims to select original research papers and review articles that discuss the current state of the art, address existing knowledge gaps, and focus on improving the diagnosis and treatment of fetal malformations, as well as those improving prenatal prediction of postnatal evolution.

About the Journal

Message from the Editorial Board

Journal of Clinical Medicine (ISSN 2077-0383) is an international, peer-reviewed, open access journal dedicated to advancing clinical and preclinical research. Our Editorial Board and staff are committed to delivering cutting-edge, timely, peer-reviewed articles spanning the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and impactful research articles, as well as reviews that are clinically significant and relevant to the full spectrum of medical disciplines. All full texts are archived in PubMed Central and indexed in SCIE (Web of Science), Scopus, PubMed, and other major databases. We invite you to submit your manuscript for publication, as well as join our community as a reviewer or reader online.

Editors-in-Chief

Prof. Dr. Emmanuel Andrès

Internal Medicine Department, University Hospital Strasbourg, 67081
Strasbourg, France

Prof. Dr. Kent Doi

Department of Emergency and Critical Care Medicine, The University of
Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1
(General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.5 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the second half of 2025).
