

## Special Issue

# Presbyopia: Current Management and Future Trends

### Message from the Guest Editor

Presbyopia is a prevalent productivity-reducing, age-related visual disorder that affects billions of people worldwide and results in a progressive near vision impairment. Conventional treatment modalities (i.e., presbyopic spectacles or contact lenses) are associated with poor acceptance, productivity loss and a negative impact on quality of life. However, numerous strategies are available to address presbyopia, such as pharmacological therapy and corneal, scleral and lenticular procedures (e.g., monovision techniques, implantation of multifocal, extended depth of focus, phakic, accommodative and intraocular lenses (IOLs)). Although no single treatment is ideal for all presbyopes, the new medical and surgical strategies increase the number of available options to address presbyopia. The primary objective of the present Special Issue is to illustrate the current medical and surgical management of presbyopia and the new trends in its treatment that could contribute to the easier, safer and more effective management of presbyopia.

## About the Journal

### Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

### Editors-in-Chief

Prof. Dr. Emmanuel Andr  s

Internal Medicine Department, University Hospital Strasbourg, 67000  
Strasbourg, France

Prof. Dr. Kent Doi

Department of Acute Care Medicine, University of Tokyo, Tokyo, Japan

---

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
