Special Issue

Current Scientific Advances in the Prevention, Diagnosis and Treatment of Parasitic Diseases

Message from the Guest Editors

Parasitic diseases remain a serious public health problem, and are a threat to the health and life of millions of people around the world. The World Health Organization (WHO) ranks parasitic infestations among the six most harmful human infectious diseases. In recent years, an increase in the incidence and number of deaths caused by parasitic diseases has been observed. This is due to, inter alia, population migration and climate change. Tourism in its broadest sense and the changing climate are conducive to the spread of parasitic diseases so far characteristic only for tropical and subtropical regions. The overuse and irresponsible use of antiparasitic drugs is also a significant problem, which leads to a reduction in their effectiveness in the treatment of diseases caused by parasites. Parasitic diseases are a growing challenge of modern medicine, and their control, diagnosis, and treatment require a great deal of effort and commitment from scientists and doctors of various specialties. This Special Issue aims to highlight the current scientific advances in the prevention, diagnosis, and treatment of parasitic diseases in children and adults.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine*'s (*JCM*) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andrès

Internal Medicine Department, University Hospital Strasbourg, 67000 Strasbourg, France

Prof. Dr. Kent Doi

Department of Emergency and Critical Care Medicine, University of Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
