Primary Immunodeficiencies: Pathogenetic Advances, Diagnostic and Management Challenges

Message from the Guest Editors

In the last decade, the research advances in the field of pediatric immunology brought a dramatic improvement in the diagnosis of primary immunodeficiency disorders. The use of new genetic panels allowed the identification of a considerable number of monogenic causes of primary immunodeficiency, each one featuring a peculiar clinical and immunological phenotype. Moreover, the discovery and molecular characterization of the monogenic causes of primary immunodeficiencies helped to better understand the complex pathogenic and clinical overlap between immunodeficiency, immune dysregulation, autoimmunity and autoinflammation. The risk of lymphoproliferation and non-hematologic malignancies in children with primary immunodeficiencies has also been deeply analyzed, providing interesting information for long-term follow-up and clinical management. The present Special Issue aims to provide an update on the intriguing field of primary immunodeficiency disorders in childhood, with a particular focus on the clinical, immunological and molecular diagnostic aspects and on the most relevant improvements in the therapeutic approach to such conditions.

Guest Editors

Dr. Rita Consolini

Section of Clinical and Laboratory Immunology, Department of Clinical and Experimental Medicine, Division of Pediatrics, University of Pisa, Pisa, Italy

Dr. Giorgio Costagliola

Section of Pediatric Hematology and Oncology, Santa Chiara Hospital, Pisa, Italy

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andr  s

Internal Medicine Department, University Hospital Strasbourg, 67000
Strasbourg, France

Prof. Dr. Kent Doi

Department of Acute Care Medicine, University of Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
