Special Issue

Current Management and Treatment of Primary and Metastatic Spinal Tumors

Message from the Guest Editors

Despite advances in the treatment of primary and metastatic tumors, clinical outcomes are still unfavorable. The skeleton is the third most common site of metastases after lung and liver, with the spine being the most frequently affected bone. Metastatic spinal tumors often result in severe pain and neurological symptoms, reducing performance status (PS), Clinicians have a number of issues that need to be resolved and improved in the management and treatment of spinal tumors. This Special Issue in Journal of Clinical *Medicine* aims to highlight recent advances which have improved the understanding of different assessments and/or innovative and personalized treatments for the management of primary and metastatic spinal tumors. Authors are encouraged to submit their original research, including systematic reviews and metaanalyses, clinical trials, observational studies, case series studies, and experimental works which present recent advances in the management and treatment of primary and metastatic spinal tumors.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine*'s (*JCM*) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andrès

Internal Medicine Department, University Hospital Strasbourg, 67000 Strasbourg, France

Prof. Dr. Kent Doi
