

Special Issue

Current Management and Treatment of Primary and Metastatic Spinal Tumors

Message from the Guest Editors

Despite advances in the treatment of primary and metastatic tumors, clinical outcomes are still unfavorable. The skeleton is the third most common site of metastases after lung and liver, with the spine being the most frequently affected bone. Metastatic spinal tumors often result in severe pain and neurological symptoms, reducing performance status (PS). Clinicians have a number of issues that need to be resolved and improved in the management and treatment of spinal tumors. This Special Issue in *Journal of Clinical Medicine* aims to highlight recent advances which have improved the understanding of different assessments and/or innovative and personalized treatments for the management of primary and metastatic spinal tumors. Authors are encouraged to submit their original research, including systematic reviews and meta-analyses, clinical trials, observational studies, case series studies, and experimental works which present recent advances in the management and treatment of primary and metastatic spinal tumors.

About the Journal

Message from the Editorial Board

Journal of Clinical Medicine (ISSN 2077-0383) is an international, peer-reviewed, open access journal dedicated to advancing clinical and preclinical research. Our Editorial Board and staff are committed to delivering cutting-edge, timely, peer-reviewed articles spanning the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and impactful research articles, as well as reviews that are clinically significant and relevant to the full spectrum of medical disciplines. All full texts are archived in PubMed Central and indexed in SCIE (Web of Science), Scopus, PubMed, and other major databases. We invite you to submit your manuscript for publication, as well as join our community as a reviewer or reader online.

Editors-in-Chief

Prof. Dr. Emmanuel Andrès

Internal Medicine Department, University Hospital Strasbourg, 67081
Strasbourg, France

Prof. Dr. Kent Doi

Department of Emergency and Critical Care Medicine, The University of
Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1
(General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.5 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the second half of 2025).
