

## Special Issue

# Clinical Advances in Prostate Cancer Treatments

### Message from the Guest Editor

Prostate cancer is the second most commonly diagnosed malignancy among men worldwide. In 2020, almost 1.4 million new cases of prostate cancer were diagnosed globally, with 375,000 cases of mortality. Prostate cancer represents a significant burden for both healthcare systems and individual patients. In recent years, crucial headway has been made into both the pathophysiology and treatment fields. There have been impressive developments in the area of biomarkers, pre biopsy MRI, prostate biopsy techniques, risk stratification and treatments. The aim of this Special Issue is to gather articles focused on prostate cancer to illustrate the current developments in prostate cancer surgery and other treatments, as well as some future insights into improving therapy results.

**Keywords:** prostate cancer; focal therapy; oligometastatic prostate cancer; robotic prostatectomy; radiotherapy; brachytherapy; HIFU; cryotherapy

## About the Journal

### Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!
