

## Special Issue

# Advances in Prosthetic Joint Infection Care

### Message from the Guest Editor

Total joint arthroplasty (TJA) delivers highly valuable outcomes to patients with the end-stage joint diseases. Some PJIs originate from hematogenous bacterial invasion or “per continuitatem” from infections occurring around the implant at some point after the surgery. PJI is usually linked to the development of biofilm on prosthetic surfaces, inducing the anti-infective inflammatory host response and resulting in premature implant failure. TJA reoperations increase the morbidity and mortality at the side of patients and burden healthcare systems. Complex preventative measures, including anti-infective implants, could reduce the incidence of biofilm development on the implant surfaces. Implementing a concept targeting early stages of hematogenous/per continuitatem PJIs is more difficult. Advanced diagnostics enable early and more precise identification of patients suffering from PJI. This can lead to interventions and even save the original implant. Together, these advancements could increase the implant survivorship. In this Special Issue, we critically review advances in the field of PJI diagnosis and prevention, and discuss future research directions.

## About the Journal

### Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

### Editors-in-Chief

Prof. Dr. Emmanuel Andrès

Internal Medicine Department, University Hospital Strasbourg, 67081  
Strasbourg, France

Prof. Dr. Kent Doi

Department of Emergency and Critical Care Medicine, The University of  
Tokyo, Tokyo, Japan

---

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.5 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the second half of 2025).
