

Special Issue

Psychosomatic Medicine

Message from the Guest Editor

Psychosomatic medicine is regarded as a comprehensive interdisciplinary framework for assessing psychological factors affecting individual vulnerability, course, and outcome of any type of disease. Psychosomatic illness is the physical condition involving organic or functional damage that is affected by psychological factors in the process of its onset or development. Stress is the term used to define the body's physiological and/or psychological reaction to circumstances that require behavioral adjustment. Specific illness may be caused when the suffering stressors are too intense and persistent. When people are vulnerable to stress because of their character and ability to adapt, psychosomatic illness is likely to occur even if the stressors are mild or moderate. The present Special Issue aims at clarifying the effects of psychosocial stress on medical conditions for diagnoses and treatments of psychosomatic illnesses. Epidemiological studies, clinical trials and proposals of theoretical models are welcomed for the understanding of psychosomatic illness conditions.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andr  s

Internal Medicine Department, University Hospital Strasbourg, 67000
Strasbourg, France

Prof. Dr. Kent Doi

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
