

Special Issue

Pulmonary Embolism in 2021 and Beyond

Message from the Guest Editors

With 900,000 patients affected and 100,000 deaths per year in the United States, pulmonary embolism is the third cause of cardiovascular death. Thromboembolic venous disease is a very active field of research, as there is still much progress to be made in the understanding of this protean pathology and its management. The objective of this special issue entitled "*Pulmonary embolism in 2021 and beyond*" is to collect a series of original research articles and high-quality review articles with the aim of increasing knowledge about this pathology and improving its management. We hope that this forward-looking and modern issue will set the stage for the management of pulmonary embolism as it will be carried out in the coming years. All fields of research will be covered: pulmonary reperfusion strategies (directed catheter thrombolysis and others...), pulmonary embolism response team, diagnostic approach, management of specific populations, predictive medicine, artificial intelligence, basic science... We trust the expertise and creativity of the authors to make their valuable contribution to this ambitious special issue.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andr  s

Internal Medicine Department, University Hospital Strasbourg, 67000
Strasbourg, France

Prof. Dr. Kent Doi

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1
(General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
