The Latest Trends in Spine Surgery

Message from the Guest Editors

In the past decade, great advances have been made in spine surgery, and innovations and techniques in this field have continued to develop and grow over the last decade rapidly; the future is bright. However, the modern goals of the future of spine surgery are to maximize the patient function and expedite a return to an improved quality of life. How will technologies shape spinal surgery during the next decade? This Special Issue aims to give its readers an overview of recent advances and continued challenges in spine surgery. We sincerely invite all spine surgeons and scholars in related fields worldwide to contribute to this Special Issue; original articles or review papers are encouraged.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!
