Special Issue

Biomarkers for Diagnosis, Complications and Therapy Effects in the Management of Endocrine and Metabolic Disorders

Message from the Guest Editors

This Special Issue contributes original research and review articles on the role of new protein, molecular, and genetic markers used for the diagnosis, differential diagnosis and for early stratification of disease severity and progression in patients with endocrine and metabolic disorders. Moreover, taking into account that in the last decade, new drugs for the treatment of civilization diseases have appeared, and new prognostic biomarkers, including genetic and molecular parameters, were proposed as important tools for better stratification of patients and monitoring the effects of implemented therapy in the treatment of endocrine and metabolic disorders. This Special Issue summarizes the basic concepts of the pathogenesis, clinic and therapy of endocrine and metabolic disorders, focusing on novel prognostic biological markers of disease that can support clinical diagnosis or predict clinical evolution and patient survival.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine*'s (*JCM*) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andrès

Internal Medicine Department, University Hospital Strasbourg, 67000 Strasbourg, France

Prof. Dr. Kent Doi

Department of Acute Care Medicine, University of Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
