Advances in Postural Orthostatic Tachycardia Syndrome (POTS)

Message from the Guest Editors

Postural Orthostatic Tachycardia Syndrome is a common and therapeutically challenging condition affecting numerous people worldwide. POTS is a chronic multi-system disorder involving the autonomic nervous system, predominantly affects young women, and it has a considerable impact on patients' health-related quality of life. Pathophysiology is incompletely understood, which is likely responsible for the limited data on effective treatments. Focused research studies on the pathophysiology and treatment of POTS have the potential to significantly improve the lives of patients with POTS.

In this Special Issue, we welcome the submission of your original research and review articles focusing on the latest advances and developments in POTS. Particularly, we encourage submissions on the following POTS-related topics:

- Biomarkers;
- Pathophysiology;
- Genetics;
- Symptoms and quality of life;
- Antibodies and immunology;
- Pharmacological interventions;
- Non-pharmacologic management.

We eagerly await your valuable contributions. Please click [here](#) to find information!

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andr  s

Internal Medicine Department, University Hospital Strasbourg, 67000
Strasbourg, France

Prof. Dr. Kent Doi

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
