Hemodialysis: Clinical Updates and Advances

Message from the Guest Editor

Hemodialysis is the most common form of renal replacement therapy for end-stage renal failure worldwide, saving the lives of millions of patients. After some time of tranquility, the field now has many new issues emerging. We have new evidence of the superiority of hemodiafiltration; we have new medium cut-off membranes for clinical practice; we have new drugs for anemia and mineral and bone disease (MBD) treatment, to mention just a few hottest topics. The issue of vascular calcifications and their reversibility is an area of intense research. Vascular access also presents a permanent challenge and a possibility for improvement. This Special Issue aims to attract some of the recent research advancements in the field, with a focus on clinical studies and the application of hemodialysis techniques.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andr  s

Internal Medicine Department, University Hospital Strasbourg, 67000
Strasbourg, France

Prof. Dr. Kent Doi

Department of Acute Care Medicine, University of Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
