Liver Transplantation: Clinical Advances and Challenges

Message from the Guest Editor

Liver transplant (LT) is an excellent option for patients with acute liver failure, end-stage liver disease, and hepatocellular carcinoma. In recent years, the continuous improvement of surgical and clinical management and the progressive eradication of hepatitis C virus infection led to a continuous increase in LT recipients' mean age. The consequence is an increase in age-related disorders such as malignancies and cardiovascular disorders. Impairment of glucose and lipid metabolism, de novo or recurrent alcoholic and non-alcoholic steatohepatitis, poor lifestyle, the deterioration of quality of life (also due to the COVID-19 pandemic), the management of immunosuppressant drugs with the hypotetic chance to stop them, represent the other main points of discussion today. This Special Issue aims to provide a comprehensive overview of the advances in the clinical management of LT recipients. Therefore, hepatology and liver transplant researchers are encouraged to submit their findings as original articles or reviews to this Special Issue.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andrès

Internal Medicine Department, University Hospital Strasbourg, 67081
Strasbourg, France

Prof. Dr. Kent Doi

Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.5 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the second half of 2025).
